panDOMO

Pandomo floor is the canvas where you develop your work of art: for all interior floor areas – homes, apartments, shops, foyers, offices, conference rooms, restaurants, reception areas, etc. You can enjoy the large stone floor area feeling without the need of unsightly grout lines! With its minimum thickness of only 5 mm, PANDOMO copes with permanent loads and its homogeneous colour won't fade.

Thickness: 5-10mm
Walkable: 3 hours
Compressive Strength: 30 MPa (28 days)
Flexural Strength: 8.5 MPa (28 days)
Ball Hardness: 80 MPa (28 days)
Tensile Strength: 8.5 MPa (28 days)

If your floor design consists of two or more colours, PANDOMO gives you a continuous floor surface, because the coloured sections meet without any metal joints. Incorporate colours exactly the way you want, create shades, graining, marbling and many other effects.

PANDOMO is the new surface design: smooth natural look, unlimited colours, a warm feel and absolute freedom. It's time to have the unique floor you've always wanted:

- the right colour for you
- unique design
- natural look
- durable (guaranteed to match the building's durability)
- environmentally safe installation

PANDOMO is available in a wide palette of both natural and vibrant tones. Concrete Artisans can also closely match colours upon request thanks to their unique sampling service. The very colour you are dreaming of is achievable because the PANDOMO liquid pigments are mixed individually.

Technical Information

- The raw material in Pandomo is Ardex's advanced Ardurapid self levelling compound. Ardurapid technology chemically utilises the mix water in building a reinforced crystalline structure guaranteeing a shrinkage free high strength floor.
- Pigments are water-based.
- The sealing system used & the Ardex liquid colour pigments are UV stable & non- yellowing.

PANDOMO has been independently tested and is compliant to Green Building Council Australia specification IEQ-13 for low VOC.
